1983 *Journal of Aircraft Index*

How to Use the Index

In the Subject Index, pages 1075-1080, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 1080-1081, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1081-1087, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1983, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

An Exploratory Study of Area-Efficient Vortex Flap Concepts **C83-171**
Observations and Implications of Natural Laminar Flow on Practical Airplane Surfaces **C83-161**
A Fundamental Comparison of Canard and Conventional Configurations **C83-160**
Jet Trajectories and Surface Pressures Induced on a Body of Revolution with Various Dual Jet Configurations **C83-159**
Adaptable Wind Tunnel for Testing V/STOL Configurations at High Lift **C83-158**
Trimming Advanced Fighters for STOL Approaches **C83-156**
Investigation of Tangential Blowing Applied to a Subsonic V/STOL Inlet **C83-151**
Wave Drag Prediction Using a Simplified Supersonic Area Rule **C83-144**
PAN AIR Applications to Complex Configurations **C83-143**
Drag of Wings with Cambered Airfoils and Partial Leading-Edge Suction **C83-142**
Correlation of Flight Test and Analytic M-on-N Air Combat Exchange Ratios **C83-141**
Subsonic/Supersonic Aeropropulsive Characteristics of Nonaxisymmetric Nozzles Installed on an F-18 Model **C83-137**
Experimental Wing and Canard Jet-Flap Aerodynamics **C83-133**
Vortex Flow Over Delta and Double-Delta Wings **C83-132**
Apparent-Mass Coefficients for Isosceles Triangles and Cross Sections Formed by Two Circles **C83-130**
Preliminary Supersonic Analysis Methods Including High Angle of Attack **C83-126**
Optimum Configuration for a 10-Passenger Business Turbofan Jet Airplane **C83-124**
Aerodynamic Aspects of Aircraft Dynamics at High Angles of Attack **C83-121**
Recent Improvements in Prediction Techniques for Supersonic Weapon Separation **C83-109**
Correction to the Wing Source Velocity Error in Woodward's USSAERO Code **C83-105**
Wind Tunnel Tests of Over-the-Wing Nacelles **C83-101**
Configuration Development of a Research Aircraft with Post-Stall Maneuverability **C83-100**
A Technique to Determine Lift and Drag Polars in Flight **C83-098**
Unique Flight Characteristics of the AD-1 Oblique-Wing Research Airplane **C83-091**
An Axisymmetric Nacelle and Turboprop Inlet Analysis Including Power Simulation **C83-087**
Alleviation of the Subsonic Pitch-Up of Delta Wings **C83-086**
Sun-Powered Aircraft Disigns **C83-080**
Computation of Nonlinear Supersonic Potential Flow over Three-Dimensional Surfaces **C83-076**
Computational Treatment of Three-Dimensional Transonic Canard-Wing Interactions **C83-075**
Development and Validation of the V/STOL Aerodynamics and Stability and Control Manual **C83-074**
Influence of Leading-Edge Thrust on Twisted and Cambered Wing Design for Supersonic Cruise **C83-072**
Zero-Length Inlets for Subsonic V/STOL Aircraft **C83-066**
Modifying a General Aviation Airfoil for Supercritical Flight **C83-061**
Analysis of Circulation-Controlled Airfoils in Transonic Flow **C83-054**
Supercitical Airfoil Boundary-Layer and Near-Wake Measurements **C83-049**
Flight Test Results of an Active Flutter Suppression System **C83-045**
Rotor Hovering Performance Using the Method of Fast Free Wake Analysis **C83-043**
Design, Analyses, and Model Tests of an Aeroelastically Tailored Lifting Surface **C83-036**
Wind Tunnel Investigation of the Transonic Aerodynamic Characteristics of Forward Swept Wings **C83-034**
Embedded Flow Characteristics of Sharp-Edged Rectanglar Wings **C83-033**
Heavy Rain Influence on Airplane Accidents **C83-031**
Strut or Guide Vane Secondary Flows and Their Effect on Turbomachinery Noise **C83-030**
Trailing Edge Flap Influence on Leading Edge Vortex Flap Aerodynamics **C83-027**
Effects of Spanwise Blowing and Reverse Thrust on Fighter Low-Speed Aerodynamics **C83-026**
Application of Panel Methods to External Stores at Supersonic Speeds **C83-025**
Comparison of Subsonic/Transonic Aftbody Flow Prediction Methods **C83-024**
Finite-Volume Solutions to the Euler Equations in Transonic Flow **C83-021**
Aerodynamic Estimation Techniques for Aerostats and Airships **C83-020**
A New Approach to Optimization for Aerodynamic Applications **C83-016**
Reductions in Parachute Drag to Forebody Wake Effects **C83-006**
Some Recent Applications of High-Lift Computational Methods at Boeing **C83-004**

Aeroelasticity

A Root Locus-Based Flutter Synthesis Procedure **C83-164**
Dynamic Stability of Flexible Forward Swept Wing Aircraft **C83-163**
Prediction of Parachute Line Sail During Lines-First Deployment **C83-153**
Pressure Measurements on Twin Vertical Tails in Buffeting Flow **C83-150**
Time-Marching Transonic Flutter Solutions Including Angle-of-Attack Effects **C83-147**
Effects of Angle of Attack on Transonic Flutter of a Supercritical Wing **C83-135**
Evaluation of Four Subcritical Response Methods for On-Line Prediction of Flutter Onset in Wind Tunnel Tests **C83-134**
Transonic Flutter Model Study of a Supercritical Wing and Winglet **C83-116**
Transonic Time-Response Analysis of 3-Degree-of-Freedom Conventional and Supercritical Airfoils **C83-115**

Rigid-Body Structural Mode Coupling on a Forward Swept Wing Aircraft C83-114
Friction Damping of Flutter in Gas Turbine Engine Airfoils C83-060
Flight Test Results of an Active Flutter Suppression System C83-045
Design, Analyses, and Model Tests of an Aeroelastically Tailored Lifting Surface C83-036
Aerodynamic Characteristics of a Slotted vs Smooth-Skin Supercritical Wing Model C83-015

Avionics Systems

All-Electric vs Conventional Aircraft: The Production/Operational Aspects C83-079
Design and Development of the RF-5E Aircraft C83-069
Microwave Ice Accretion Measurement Instrument (MIAMI) C83-044

Cabin Environment, Crew Training, and Life Support

Interior Noise Considerations for Advanced High-Speed Turboprop Aircraft C83-127
Meteorological Inputs to Flight Simulators C83-014

Configuration Design

Application of Energy Saving Concepts to Fighter/Attack Design C83-172
Aircraft Carrier--Surface Effect Ship C83-167
A Fundamental Comparison of Canard and Conventional Configurations C83-160
PAN AIR Applications to Complex Configurations C83-143
Apparent-Mass Coefficients for Isosceles Triangles and Cross Sections Formed by Two Circles C83-130
Optimum Configuration for a 10-Passenger Business Turbofan Jet Airplane C83-124
Configuration Development of a Research Aircraft with Post-Stall Maneuverability C83-100
Performance Estimation for Light Propeller Airplanes C83-092
Advanced Turboprop Cargo Aircraft Systems Study C83-085
Design and Development of the RF-5E Aircraft C83-069
Wind Tunnel Investigation of the Transonic Aerodynamic Characteristics of Forward Swept Wings C83-034
Some Recent Applications of High-Lift Computational Methods at Boeing C83-004

Deceleration Systems

Prediction of Parachute Line Sail During Lines-First Deployment C83-153
Net-Skirt Addition to a Parachute Canopy to Prevent Inversion C83-096
Effects of Spanwise Blowing and Reverse Thrust on Fighter Low-Speed Aerodynamics C83-026
Modular Asymmetric Parachute for Wind Tunnel Testing C83-013
Reductions in Parachute Drag to Forebody Wake Effects C83-006

Flight Operations

Analysis of General Aviation Accidents Using ATC Radar Records C83-140
Dynamics of Air Combat C83-099
Modeling the Spatial Distribution of Aircraft on Visual Flight Rules C83-062
CTOL, STOAL, V/STOL:An Operational Comparison for Forward Deployed CVNs C83-038
Heavy Rain Influence on Airplane Accidents C83-031
Airborne Operation of an Infrared Low-Level Wind Shear Prediction System C83-028

Fuels and Fuel Systems

Transient Flow Analysis of an Aircraft Refueling System C83-166
An Assessment of the Safety of Hydrogen-Fueled Aircraft C83-152
Degradation and Characterization of Anti-misting Kerosene C83-057
Digital Electronic Engine Control System--F-15 Flight Test C83-022

General Aviation

Observations and Implications of Natural Laminar Flow on Practical Airplane Surfaces C83-161
A Fundamental Comparison of Canard and Conventional Configurations C83-160
Analysis of an Airplane Windshield Anti-Icing System Using Hot Air C83-157
Analysis of General Aviation Accidents Using ATC Radar Records C83-140
Laboratory Study of Add-On Treatments for Interior Noise Control in Light Aircraft C83-084
Modeling the Spatial Distribution of Aircraft on Visual Flight Rules C83-062
Icing Analysis of an Unprotected Aircraft Radome C83-029
Airborne Operation of an Infrared Low-Level Wind Shear Prediction System C83-028
Procedure for Evaluation of Engine Isolators for Reduced Structure-Borne Noise Transmission C83-011
Cross-Coupling Between Longitudinal and Lateral Aircraft Dynamics in a Spiral Dive C83-003

Ground Support

Automated Profiling of the Troposphere C83-058

Guidance and Control

Control of Aeroelastic Divergence C83-162
Heavy-Lift Airship Dynamics C83-070

Handling Qualities, Stability and Control

Effects of Atmospheric Turbulence on a Quadrotor Heavy Lift Airship C83-169
Uses of Parameter Estimation in Flight Test C83-168
Dynamic Stability of Flexible Forward Swept Wing Aircraft C83-163
Control of Aeroelastic Divergence C83-162
Aerodynamic Aspects of Aircraft Dynamics at High Angles of Attack C83-121
Configuration Development of a Research Aircraft with Post-Stall Maneuverability C83-100
Unique Flight Characteristics of the AD-1 Oblique-Wing Research Airplane C83-091
Alleviation of the Subsonic Pitch-Up of Delta Wings C83-086
The Definition of Short-Period Flying Qualities Characteristics via Equivalent Systems C83-081
Airplane Model Structure Determination from Flight Data C83-077
Development and Validation of the V/STOL Aerodynamics and Stability and Control Manual C83-074
Stability of Steady Sideslip Equilibria for High Alpha C83-053
Dynamic Stability of a Buoyant Quad-Rotor Aircraft C83-041
Spin Prediction Techniques C83-017
Cross-Coupling Between Longitudinal and Lateral Aircraft Dynamics in a Spiral Dive C83-003
A New Concept for Aircraft Dynamic Stability Testing C83-001

Helicopters

Acoustics of Rotors Utilizing Circulation Control C83-154
Optimal Frequency Response Modification by Added Passive Structures C83-146
Helicopter IFR Approaches into Major Terminals Using RNAV, MLS, and CDTI C83-110
In-Flight Computation of Helicopter Transmission Fatigue Life Expenditure C83-106

Landing Dynamics

Investigation of Landing Gear Alternatives for High Performance Aircraft C83-052
Heavy Rain Influence on Airplane Accidents C83-031
Airborne Operation of an Infrared Low-Level Wind Shear Prediction System C83-028

Lighter-than-Airships

Effects of Atmospheric Turbulence on a Quadrotor Heavy Lift Airship C83-169
Heavy-Lift Airship Dynamics C83-070
Dynamic Stability of a Buoyant Quad-Rotor Aircraft C83-041
Aerodynamic Estimation Techniques for Aerostats and Airships C83-020

Military Missions

Type A V/STOL: One Aircraft for All Support Missions? C83-083
Design and Development of the RF-5E Aircraft C83-069
CTOL, STOAL, V/STOL:An Operational Comparison for Forward Deployed CVNs C83-038

Navigation, Communication, and Traffic Control

Analysis of General Aviation Accidents Using ATC Radar Records C83-140
Helicopter IFR Approaches into Major Terminals Using RNAV, MLS, and CDTI C83-110
Optimum Siting of NEXRAD to Detect Hazardous Weather at Airports C83-059

Noise

Lateral Attenuation of Aircraft Noise C83-155
Acoustics of Rotors Utilizing Circulation Control C83-154
Model Test and Full-Scale Checkout of Dry-Cooled Jet Runnup Sound Suppressors C83-139
Aircraft Trajectories for Reduced Noise Impact C83-128
Interior Noise Considerations for Advanced High-Speed Turboprop Aircraft C83-127
Advanced Turboprop Cargo Aircraft Systems Study C83-085
Laboratory Study of Add-On Treatments for Interior Noise Control in Light Aircraft C83-084
Single- and Double-Wall Cylinder Noise Reduction C83-071

Ground Effects on Aircraft Noise for a Wide-Body Commercial Airplane C83-056
Turbofan Engine Blade Pressure and Acoustic Radiation at Simulated Forward Speed C83-048
Acoustic Environment in Large Enclosures With a Small Opening Exposed to Flow C83-042
High Bypass Ratio Engine Noise Component Separation by Coherence Technique C83-040
Effect of Swirl on the Potential Core in Two-Dimensional Ejector Nozzles C83-032
Procedure for Evaluation of Engine Isolators for Reduced Structure-Borne Noise Transmission C83-011
Wind Tunnel Measurements of Blade/Vane Ratio and Spacing Effects on Fan Noise C83-008
Novel Airborne Technique for Aircraft Noise Measurements Above the Flight Path C83-007
Propeller Noise at Model- and Full-Scale C83-005

Performance

An Exploratory Study of Area-Efficient Vortex Flap Concepts C83-171
Correlation of Flight Test and Analytic M-on-N Air Combat Exchange Ratios C83-141
Optimum Configuration for a 10-Passenger Business Turbofan Jet Airplane C83-124
Generalized Maximum Specific Range Performance C83-103
A Technique to Determine Lift and Drag Polars in Flight C83-098
Performance Estimation for Light Propeller Airplanes C83-092
Zero-Length Inlets for Subsonic V/STOL Aircraft C83-066
Trailing Edge Flap Influence on Leading Edge Vortex Flap Aerodynamics C83-027

Powerplant Design

Strong Pressure Waves in Air-Breathing Engines C83-138
V/STOL Status from the Engine Technology Viewpoint C83-097
Development of Counter-Rotating Intershaft Support Bearing Technology C83-090
All-Electric vs Conventional Aircraft: The Production/Operational Aspects C83-079
Propulsion System Installation Design for High-Speed Prop-Fans C83-068
Friction Damping of Flutter in Gas Turbine Engine Airfoils C83-060
Tactical Aircraft Engine Usage--A Statistical Study C83-055
Setting Design Goals for Advanced Propulsion Systems C83-035
Wind Tunnel Measurements of Blade/Vane Ratio and Spacing Effects on Fan Noise C83-008
Rolls-Royce RB 211-535 Power Plant C83-002

Propeller and Rotor Systems

The Effect of Displacement Velocity on Propeller Performance C83-120
Advanced Turboprop Cargo Aircraft Systems Study C83-085
Propulsion System Installation Design for High-Speed Prop-Fans C83-068
Rotor Hovering Performance Using the Method of Fast Free Wake Analysis C83-043
Dynamic Stability of a Buoyant Quad-Rotor Aircraft C83-041
Propeller Noise at Model- and Full-Scale C83-005

Simulation

Effects of Atmospheric Turbulence on a Quadrotor Heavy Lift Airship C83-169
Transient Flow Analysis of an Aircraft Refueling System C83-166
Prediction of Parachute Line Sail During Lines-First Deployment C83-153
Helicopter IFR Approaches into Major Terminals Using RNAV, MLS, and CDTI C83-110
Heavy-Lift Airship Dynamics C83-070
Modeling the Spatial Distribution of Aircraft on Visual Flight Rules C83-062
Investigation of Landing Gear Alternatives for High Performance Aircraft C83-052
Meteorological Inputs to Flight Simulators C83-014
Cross-Coupling Between Longitudinal and Lateral Aircraft Dynamics in a Spiral Dive C83-003

Structural Design (including Loads)

Statistical Crack Propagation in Fastener Holes Under Spectrum Loading C83-165
A Root Locus-Based Flutter Synthesis Procedure C83-164
Bonded Aluminum Honeycomb--Aircraft Flight Surface Primary Structure Application C83-129
Analysis of Aircraft Dynamic Behavior in a Crash Environment C83-123
Durability and Damage Tolerance Control Plans for U.S. Air Force Aircraft C83-113
Flight Tests of Tow Wire Forces while Flying a Racetrack Pattern C83-104
Tactical Aircraft Engine Usage--A Statistical Study C83-055
Sonic Fatigue of Advanced Composite Panels C83-047
Design, Analyses, and Model Tests of an Aeroelastically Tailored Lifting Surface C83-036
NAPC Gyroscopic Moment Test Facility C83-023

Structural Materials

Comparison of Properties of Joints Prepared by Ultrasonic Welding and Other Means C83-089
Sonic Fatigue of Advanced Composite Panels C83-047
Cast Transage 175 Titanium Alloy for Durability Critical Structural Components C83-009

Subsystem Design

All-Electric vs Conventional Aircraft: The Production/Operational Aspects C83-079
Digital Electronic Engine Control System--F-15 Flight Test C83-022

Testing, Flight and Ground

Adaptable Wind Tunnel for Testing V/STOL Configurations at High Lift C83-158
Analysis of an Airplane Windshield Anti-Icing System Using Hot Air C83-157
Acoustics of Rotors Utilizing Circulation Control C83-154
Experiences in the Use of Composite Material for a Wing Skin C83-149
F/A-18 Inlet/Engine Compatibility Flight Test Results C83-107
Flight Tests of Tow Wire Forces while Flying a Racetrack Pattern C83-104
A Technique to Determine Lift and Drag Polars in Flight C83-098
Aeroballistic Characteristics of 3-ft-long Parachute Decelerators C83-073
Zero-Length Inlets for Subsonic V/STOL Aircraft C83-066
Tactical Aircraft Engine Usage--A Statistical Study C83-055
High Bypass Ratio Engine Noise Component Separation by Coherence Technique C83-040
Compact Installation for Testing Vectored-Thrust Engines C83-039
Icing Analysis of an Unprotected Aircraft Radome C83-029
NAPC Gyroscopic Moment Test Facility C83-023
Digital Electronic Engine Control System--F-15 Flight Test C83-022
Aerodynamic Characteristics of a Slotted vs Smooth-Skin Supercritical Wing Model C83-015
Modular Asymmetric Parachute for Wind Tunnel Testing C83-013
A New Concept for Aircraft Dynamic Stability Testing C83-001

Vibration

Flight Tests of Tow Wire Forces while Flying a Racetrack Pattern C83-104
Laboratory Study of Add-On Treatments for Interior Noise Control in Light Aircraft C83-084
Friction Damping of Flutter in Gas Turbine Engine Airfoils C83-060

Energy

Conservation

Application of Energy Saving Concepts to Fighter/Attack Design C83-172
18:1 Pressure Ratio Axial/Centrifugal Compressor Demonstration Program C83-067

Hydrogen and Unique Fuels

An Assessment of the Safety of Hydrogen-Fueled Aircraft C83-152

Microwaves

Microwave Ice Accretion Measurement Instrument (MIAMI) C83-044

Photovoltaic Power

Sun-Powered Aircraft Disigns C83-080

Rotating Machinery

Turbofan Engine Blade Pressure and Acoustic Radiation at Simulated Forward Speed C83-048

Fluid Dynamics

Aeroacoustics

Single- and Double-Wall Cylinder Noise Reduction C83-071
Ground Effects on Aircraft Noise for a Wide-Body Commercial Airplane C83-056
Turbofan Engine Blade Pressure and Acoustic Radiation at Simulated Forward Speed C83-048
Acoustic Environment in Large Enclosures With a Small Opening Exposed to Flow C83-042
High Bypass Ratio Engine Noise Component Separation by Coherence Technique C83-040

Strut or Guide Vane Secondary Flows and Their Effect on Turbomachinery Noise C83-030
Wind Tunnel Measurements of Blade/Vane Ratio and Spacing Effects on Fan Noise C83-008
Novel Airborne Technique for Aircraft Noise Measurements Above the Flight Path C83-007
Propeller Noise at Model- and Full-Scale C83-005

Boundary-Layer Stability and Transition

Observations and Implications of Natural Laminar Flow on Practical Airplane Surfaces C83-161

Computational Methods

Computations of Unsteady Transonic Aerodynamics Using Prescribed Steady Pressures C83-170
Wave Drag Prediction Using a Simplified Supersonic Area Rule C83-144
PAN AIR Applications to Complex Configurations C83-143
Vortex Flow Over Delta and Double-Delta Wings C83-132
Preliminary Supersonic Analysis Methods Including High Angle of Attack C83-126
Correction to the Wing Source Velocity Error in Woodward's USSAERO Code C83-105
Improved Numerical Method for Unsteady Lifting Surfaces in Incompressible Flow C83-102
Computation of Nonlinear Supersonic Potential Flow over Three-Dimensional Surfaces C83-076
Computational Treatment of Three-Dimensional Transonic Canard-Wing Interactions C83-075
Influence of Leading-Edge Thrust on Twisted and Cambered Wing Design for Supersonic Cruise C83-072
Modifying a General Aviation Airfoil for Supercritical Flight C83-061
Rotor Hovering Performance Using the Method of Fast Free Wake Analysis C83-043
Application of Panel Methods to External Stores at Supersonic Speeds C83-025
Comparison of Subsonic/Transonic Aftbody Flow Prediction Methods C83-024
Finite-Volume Solutions to the Euler Equations in Transonic Flow C83-021
Some Recent Applications of High-Lift Computational Methods at Boeing C83-004

Hydrodynamics

Aircraft Carrier--Surface Effect Ship C83-167
Transient Flow Analysis of an Aircraft Refueling System C83-166

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Jet Trajectories and Surface Pressures Induced on a Body of Revolution with Various Dual Jet Configurations C83-159
Freestream Turbulence Effects on Compressor Cascade Wake C83-119
Injection Slot Location for Boundary-Layer Control in Shock-Induced Separation C83-118
Transonic Shock/Turbulent Boundary-Layer Interaction on Curved Surfaces C83-093
Analysis of Circulation-Controlled Airfoils in Transonic Flow C83-054
Design and Development of a Mixer Compound Exhaust System C83-051
Supercitical Airfoil Boundary-Layer and Near-Wake Measurements C83-049
Comparison of Subsonic/Transonic Aftbody Flow Prediction Methods C83-024
Reductions in Parachute Drag to Forebody Wake Effects C83-006

Multiphase Flows

Characterization of Particle Rebound Phenomena in the Erosion of Turbomachinery C83-046

Nonsteady Aerodynamics

Computations of Unsteady Transonic Aerodynamics Using Prescribed Steady Pressures C83-170
Pressure Measurements on Twin Vertical Tails in Buffeting Flow C83-150
Time-Marching Transonic Flutter Solutions Including Angle-of-Attack Effects C83-147
Strong Pressure Waves in Air-Breathing Engines C83-138
Improved Numerical Method for Unsteady Lifting Surfaces in Incompressible Flow C83-102

Nozzle and Channel Flow

A New Facility and Technique for Two-Dimensional Aerodynamic Testing C83-088
Three-Dimensional Viscous Analysis of Ducts and Flow Splitters C83-064
Degradation and Characterization of Antimisting Kerosene C83-057
Design and Development of a Mixer Compound Exhaust System C83-051
Effect of Swirl on the Potential Core in Two-Dimensional Ejector Nozzles C83-032

Shock Waves and Detonations

Injection Slot Location for Boundary-Layer Control in Shock-Induced Separation C83-118

Subsonic Flow

An Exploratory Study of Area-Efficient Vortex Flap Concepts C83-171
Vortex Flow Over Delta and Double-Delta Wings C83-132
Supersonic Three-Dimensional Oscillatory Piecewise Continuous Kernel Function Method C83-111
Improved Numerical Method for Unsteady Lifting Surfaces in Incompressible Flow C83-102
Alleviation of the Subsonic Pitch-Up of Delta Wings C83-086
Aeroballistic Characteristics of 3-ft-long Parachute Decelerators C83-073
Compact Installation for Testing Vectored-Thrust Engines C83-039

Supersonic and Hypersonic Flow

Wave Drag Prediction Using a Simplified Supersonic Area Rule C83-144
Preliminary Supersonic Analysis Methods Including High Angle of Attack C83-126
Injection Slot Location for Boundary-Layer Control in Shock-Induced Separation C83-118
Recent Improvements in Prediction Techniques for Supersonic Weapon Separation C83-109
Computation of Nonlinear Supersonic Potential Flow over Three-Dimensional Surfaces C83-076
Influence of Leading-Edge Thrust on Twisted and Cambered Wing Design for Supersonic Cruise C83-072
Application of Panel Methods to External Stores at Supersonic Speeds C83-025

Transonic Flow

Computations of Unsteady Transonic Aerodynamics Using Prescribed Steady Pressures C83-170
Transonic Time-Response Analysis of 3-Degree-of-Freedom Conventional and Supercritical Airfoils C83-115
Transonic Shock/Turbulent Boundary-Layer Interaction on Curved Surfaces C83-093
An Axisymmetric Nacelle and Turboprop Inlet Analysis Including Power Simulation C83-087
Computational Treatment of Three-Dimensional Transonic Canard-Wing Interactions C83-075
Modifying a General Aviation Airfoil for Supercritical Flight C83-061
Analysis of Circulation-Controlled Airfoils in Transonic Flow C83-054
Supercitical Airfoil Boundary-Layer and Near-Wake Measurements C83-049
Wind Tunnel Investigation of the Transonic Aerodynamic Characteristics of Forward Swept Wings C83-034
Embedded Flow Characteristics of Sharp-Edged Rectanglar Wings C83-033
Finite-Volume Solutions to the Euler Equations in Transonic Flow C83-021
Aerodynamic Characteristics of a Slotted vs Smooth-Skin Supercritical Wing Model C83-015

Viscous Nonboundary-Layer Flows

Three-Dimensional Viscous Analysis of Ducts and Flow Splitters C83-064

Wave Motion and Sloshing

Strong Pressure Waves in Air-Breathing Engines C83-138

Interdisciplinary Topics

Aerospace Technology Utilization

Application of Energy Saving Concepts to Fighter/Attack Design C83-172
Aircraft Carrier--Surface Effect Ship C83-167
18:1 Pressure Ratio Axial/Centrifugal Compressor Demonstration Program C83-067

Analytical and Numerical Methods

Approximation to the Optimization of a Coast-Glide Trajectory C83-145
Finite-Element Analysis of the T-38 Aircraft Canopy C83-112
Correction to the Wing Source Velocity Error in Woodward's USSAERO Code C83-105
Embedded Flow Characteristics of Sharp-Edged Rectanglar Wings C83-033
A New Approach to Optimization for Aerodynamic Applications C83-016

Atmospheric and Space Sciences

Automated Profiling of the Troposphere C83-058
Aerodynamic Penalties of Heavy Rain on Landing Airplanes C83-019
Meteorological Inputs to Flight Simulators C83-014

Computer Communications, Information Processing and Software

The Role and Application of Data Base Management in Integrated Computer-Aided Design C83-117

Computer Software

Design Optimization Codes for Structures: DOCS Computer Program C83-131

Computer Technology

The Role and Application of Data Base Management in Integrated Computer-Aided Design C83-117
Microwave Ice Accretion Measurement Instrument (MIAMI) C83-044

Human Factors

Aircraft Trajectories for Reduced Noise Impact C83-128
Interior Noise Considerations for Advanced High-Speed Turboprop Aircraft C83-127

Numerical Analysis

Design Optimization Codes for Structures: DOCS Computer Program C83-131

Reliability, Maintainability, and Logistics Support

Net-Skirt Addition to a Parachute Canopy to Prevent Inversion C83-096
Setting Design Goals for Advanced Propulsion Systems C83-035

Research Facilities and Instrumentation

A New Facility and Technique for Two-Dimensional Aerodynamic Testing C83-088
Novel Airborne Technique for Aircraft Noise Measurements Above the Flight Path C83-007

Safety

An Assessment of the Safety of Hydrogen-Fueled Aircraft C83-152
Net-Skirt Addition to a Parachute Canopy to Prevent Inversion C83-096
Optimum Siting of NEXRAD to Detect Hazardous Weather at Airports C83-059
Automated Profiling of the Troposphere C83-058

Sensor Systems

Optimum Siting of NEXRAD to Detect Hazardous Weather at Airports C83-059

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Recent Improvements in Prediction Techniques for Supersonic Weapon Separation C83-109

Simulation

New Thermal and Trajectory Model for High-Altitude Balloons C83-082

Testing, Flight and Ground

Aeroballistic Characteristics of 3-ft-long Parachute Decelerators C83-073

Trajectories and Tracking Systems

New Thermal and Trajectory Model for High-Altitude Balloons C83-082

Propulsion

Airbreathing Propulsion

Investigation of Tangential Blowing Applied to a Subsonic V/STOL Inlet C83-151
Freestream Turbulence Effects on Compressor Cascade Wake C83-119
JT9D Performance Deterioration Results from a Simulated Aerodynamic Load Test C83-108
F/A-18 Inlet/Engine Compatibility Flight Test Results C83-107
V/STOL Status from the Engine Technology Viewpoint C83-097
Development of Counter-Rotating Intershaft Support Bearing Technology C83-090
An Axisymmetric Nacelle and Turboprop Inlet Analysis Including Power Simulation C83-087
Propulsion System Installation Design for High-Speed Prop-Fans C83-068
18:1 Pressure Ratio Axial/Centrifugal Compressor Demonstration Program C83-067
Analysis of Engine Usage Data for Tactical Systems C83-065
Design and Development of a Mixer Compound Exhaust System C83-051
Effect of Variable Guide Vanes on the Performance of a High-Bypass Turbofan Engine C83-050
Characterization of Particle Rebound Phenomena in the Erosion of Turbomachinery C83-046
Compact Installation for Testing Vectored-Thrust Engines C83-039
Internal Performance Prediction for Advanced Exhaust Systems C83-037
Setting Design Goals for Advanced Propulsion Systems C83-035
Effect of Swirl on the Potential Core in Two-Dimensional Ejector Nozzles C83-032
Strut or Guide Vane Secondary Flows and Their Effect on Turbomachinery Noise C83-030
NAPC Gyroscopic Moment Test Facility C83-023
Rolls-Royce RB 211-535 Power Plant C83-002

Combustion and Combustor Designs

TF41/Lamilloy Accelerated Mission Test C83-010

Engine Control

Effect of Variable Guide Vanes on the Performance of a High-Bypass Turbofan Engine C83-050

Engine Performance

JT9D Performance Deterioration Results from a Simulated Aerodynamic Load Test C83-108
F/A-18 Inlet/Engine Compatibility Flight Test Results C83-107
Generalized Maximum Specific Range Performance C83-103
Analysis of Engine Usage Data for Tactical Systems C83-065
Effect of Variable Guide Vanes on the Performance of a High-Bypass Turbofan Engine C83-050

Environmental Effects

Lateral Attenuation of Aircraft Noise C83-155
Ground Contamination by Fuel Jettisoned from Aircraft in Flight C83-063

Fuels and Propellants, Properties of

Ground Contamination by Fuel Jettisoned from Aircraft in Flight C83-063

Support Systems

Model Test and Full-Scale Checkout of Dry-Cooled Jet Runnup Sound Suppressors C83-139

Spacecraft Technology

Entry Vehicle Dynamics and Control

Uses of Parameter Estimation in Flight Test C83-168

Structural Mechanics and Materials

Aeroelasticity and Hydroelasticity

Control of Aeroelastic Divergence C83-162
Effects of Angle of Attack on Transonic Flutter of a Supercritical Wing C83-135
Evaluation of Four Subcritical Response Methods for On-Line Prediction of Flutter Onset in Wind Tunnel Tests C83-134
Transonic Flutter Model Study of a Supercritical Wing and Winglet C83-116
Transonic Time-Response Analysis of 3-Degree-of-Freedom Conventional and Supercritical Airfoils C83-115
Rigid-Body Structural Mode Coupling on a Forward Swept Wing Aircraft C83-114

Materials, Properties of

Experiences in the Use of Composite Material for a Wing Skin C83-149
Comparison of Properties of Joints Prepared by Ultrasonic Welding and Other Means C83-089
Turbine Blade Nonlinear Structural and Life Analysis C83-078
Cast Transage 175 Titanium Alloy for Durability Critical Structural Components C83-009
Design Allowables for T300/5208 Graphite/Epoxy Composite Materials C82-128

Structural Composite Materials

Experiences in the Use of Composite Material for a Wing Skin C83-149
Tensile Buckling of Advanced Turboprops C83-148
Stress Analysis of Stepped-Lap Joints with Bondline Flaws C83-136
Moisture and Temperature Effects on the Instability of Cylindrical Composite Panels C83-125
Sun-Powered Aircraft Disigns C83-080
Design for Global Damage Tolerance and Associated Mass Penalties C83-012
Design Allowables for T300/5208 Graphite/Epoxy Composite Materials C82-128

Structural Design

A Root Locus-Based Flutter Synthesis Procedure C83-164
Design Optimization Codes for Structures: DOCS Computer Program C83-131
Bonded Aluminum Honeycomb--Aircraft Flight Surface Primary Structure Application C83-129
Analysis of Aircraft Dynamic Behavior in a Crash Environment C83-123
The Role and Application of Data Base Management in Integrated Computer-Aided Design C83-117
Durability and Damage Tolerance Control Plans for U.S. Air Force Aircraft C83-113

Design for Global Damage Tolerance and Associated Mass Penalties C83-012

Structural Durability (including Fatigue and Fracture)

Statistical Crack Propagation in Fastener Holes Under Specirum Loading C83-165
Durability and Damage Tolerance Control Plans for U.S. Air Force Aircraft C83-113
Finite-Element Analysis of the T-38 Aircraft Canopy C83-112
Comparison of Properties of Joints Prepared by Ultrasonic Welding and Other Means C83-089
Turbine Blade Nonlinear Structural and Life Analysis C83-078
Sonic Fatigue of Advanced Composite Panels C83-047
Characterization of Particle Rebound Phenomena in the Erosion of Turbomachinery C83-046
Fatigue Sensitivity of Composite Structure for Fighter Aircraft C83-018
Cast Transage 175 Titanium Alloy for Durability Critical Structural Components C83-009
Design Allowables for T300/5208 Graphite/Epoxy Composite Materials C82-128

Structural Dynamics

Pressure Measurements on Twin Vertical Tails in Buffeting Flow C83-150
Tensile Buckling of Advanced Turboprops C83-148
Time-Marching Transonic Flutter Solutions Including Angle-of-Attack Effects C83-147
Optimal Frequency Response Modification by Added Passive Structures C83-146
Evaluation of Four Subcritical Response Methods for On-Line Prediction of Flutter Onset in Wind Tunnel Tests C83-134
Analysis of Aircraft Dynamic Behavior in a Crash Environment C83-123
Transonic Flutter Model Study of a Supercritical Wing and Winglet C83-116
Rigid-Body Structural Mode Coupling on a Forward Swept Wing Aircraft C83-114
Single- and Double-Wall Cylinder Noise Reduction C83-071
Flight Test Results of an Active Flutter Suppression System C83-045
Procedure for Evaluation of Engine Isolators for Reduced Structure-Borne Noise Transmission C83-011

Structural Stability

Dynamic Stability of Flexible Forward Swept Wing Aircraft C83-163
Tensile Buckling of Advanced Turboprops C83-148
Moisture and Temperature Effects on the Instability of Cylindrical Composite Panels C83-125

Structural Statics

Stress Analysis of Stepped-Lap Joints with Bondline Flaws C83-136

Thermal Stresses

Turbine Blade Nonlinear Structural and Life Analysis C83-078

Thermophysics and Thermochemistry

Thermal Modeling and Analysis

Analysis of an Airplane Windshield Anti-Icing System Using Hot Air C83-157
New Thermal and Trajectory Model for High-Altitude Balloons C83-082
Icing Analysis of an Unprotected Aircraft Radome C83-029

Chronological Index

C82-128 Design Allowables for T300/5208 Graphite/Epoxy Composite Materials. J. C. Ekvall and C. F. Griffin, *Lockheed-California Company* (JA **1**, 8, p. 661) Article based on AIAA Paper 81-0541 CP811
Errata (JA **20**, 6, p. 576)

C83-001 A New Concept for Aircraft Dynamic Stability Testing. Martin E. Beyers, *National Research Council of Canada* (JA **20**, 1, p. 5) Article based on AIAA Paper 81-0158

C83-002 Rolls-Royce RB 211-535 Power Plant. D. J. Pickerell, *Rolls-Royce Limited (England)* (JA **20**, 1, p. 15) Article based on AIAA Paper 81-0807

C83-003 Cross-Coupling Between Longitudinal and Lateral Aircraft Dynamics in a Spiral Dive. M. Velger and J. Shinar, *Technion-Israel Institute of Technology* (JA **20**, 1, p. 21) Article

C83-004 Some Recent Applications of High-Lift Computational Methods at Boeing. J. H. McMasters and M. L. Henderson, *Boeing Commercial Airplane Company* (JA **20**, 1, p. 27) Article based on AIAA Paper 81-1657

C83-005 Propeller Noise at Model- and Full-Scale. W. J. G. Trebble and J. Williams, *Royal Aircraft Establishment (Great Britain)*; and R. P. Donnelly, *Dowty-Rotol Limited (Great Britain)* (JA **20**, 1, p. 34) Article based on AIAA Paper 81-2004

C83-006 Reductions in Parachute Drag to Forebody Wake Effects. Carl W. Peterson and Donald W. Johnson, *Sandia National Laboratories* (JA **20**, 1, p. 42) Article based on AIAA Paper 81-1939

C83-007 Novel Airborne Technique for Aircraft Noise Measurements Above the Flight Path. T. A. Holbeche and A. F. Hazell, *Royal Aircraft Establishment (Great Britain)* (JA **20**, 1, p. 50) Article based on AIAA Paper 81-2028

C83-008 Wind Tunnel Measurements of Blade/Vane Ratio and Spacing Effects on Fan Noise. Richard P. Woodward and Frederick W. Glaser, *NASA Lewis Research Center* (JA **20**, 1, p. 58) Article based on AIAA Paper 81-2032

C83-009 Cast Transage 175 Titanium Alloy for Durability Critical Structural Components. F. A. Crossley, *Lockheed Missiles & Space Company*; and W. J. Barice, *Precision Castparts Corporation* (JA **20**, 1, p. 66) Article based on AIAA Paper 81-0535 CP811

C83-010 TF41/Lamilloy Accelerated Mission Test. D. J. Essman, *Wright Patterson Air Force Base*; R. E. Vogel, J. G. Tomlinson and A. S. Novick, *Detroit Diesel Allison, Division of General Motors Corporation* (JA **20**, 1, p. 70) Article based on AIAA Paper 81-1394

C83-011 Procedure for Evaluation of Engine Isolators for Reduced Structure-Borne Noise Transmission. J. F. Unruh, *Southwest Research Institute* (JA **20**, 1, p. 76) Article based on AIAA Paper 81-1970

C83-012 Design for Global Damage Tolerance and Associated Mass Penalties. Raphael T. Haftka, *Virginia Polytechnic Institute and State University*; James H. Starnes Jr., *NASA Langley Research Center*; and Sudhakar, Nair, *Illinois Institute of Technology* (JA **20**, 1, p. 83) Article

C83-013 Modular Asymmetric Parachute for Wind Tunnel Testing. P. C. Klimas, H. E. Widdows and R. H. Croll, *Sandia National Laboratories* (JA **20**, 1, p. 89) Engineering Note based on AIAA Paper 81-1933

C83-014 Meteorological Inputs to Flight Simulators. John T. Klehr, *Singer Company* (JA **20**, 1, p. 91) Engineering Note based on AIAA Paper 82-0216

C83-015 Aerodynamic Characteristics of a Slotted vs Smooth-Skin Supercritical Wing Model. William F. Grosser, *Lockheed-Georgia Company* (JA **20**, 1, p. 92) Engineering Note

C83-016 A New Approach to Optimization for Aerodynamic Applications. Magdi H. Rizk, *Flow Industries, Inc.* (JA **20**, 1, p. 94) Engineering Note

C83-017 Spin Prediction Techniques. William Bihrle Jr. and Billy Barnhart, *Bihrle Applied Research, Inc.* (JA **20**, 1, p. 97) Article based on AIAA Paper 80-1564 CP806

C83-018 Fatigue Sensitivity of Composite Structure for Fighter Aircraft. L. L. Jeans, G. C. Grimes and H. P. Kan, *Northrop Corporation* (JA **20**, 2, p. 102) Article based on AIAA Paper 81-0495 CP811

C83-019 Aerodynamic Penalties of Heavy Rain on Landing Airplanes. P. Haines and J. Luers, *University of Dayton Research Institute* (JA **20**, 2, p. 111) Article

C83-020 Aerodynamic Estimation Techniques for Aerostats and Airships. S. P. Jones and J. D. DeLaurier, *TCOM Corporation* (JA **20**, 2, p. 120) Article based on AIAA Paper 81-1339 CP815

C83-021 Finite-Volume Solutions to the Euler Equations in Transonic Flow. Wolfgang Schmidt, *Dornier GmbH, (FRG)*; Antony Jameson, *Princeton University*; and David Whitfield, *Mississippi State University* (JA **20**, 2, p. 127) Article based on AIAA Paper 81-1265

C83-022 Digital Electronic Engine Control System--F-15 Flight Test. W. J. Barrett and J. P. Rembold, *Pratt & Whitney Aircraft*; F. W. Burcham Jr. and L. P. Myers, *Hugh L. Dryden Flight Research Center* (JA **20**, 2, p. 134) Article based on AIAA Paper 81-1501

C83-023 NAPC Gyroscopic Moment Test Facility. H. C. Scott, *Naval Air Propulsion Center* (JA **20**, 2, p. 142) Article based on AIAA Paper 81-1480

C83-024 Comparison of Subsonic/Transonic Aftbody Flow Prediction Methods. Lawrence E. Putnam, *NASA Langley Research Center*; and James Mace, *Air Force Wright Aeronautical Laboratories* (JA **20**, 2, p. 146) Article based on AIAA Paper 81-1694

C83-025 Application of Panel Methods to External Stores at Supersonic Speeds. J. D. Waskiewicz and J. E. DeJongh, *Flight Dynamics Laboratory, WPAFB*; and A. Cenko, *Grumman Aerospace Company* (JA **20**, 2, p. 153) Article based on AIAA Paper 81-1653

C83-026 Effects of Spanwise Blowing and Reverse Thrust on Fighter Low-Speed Aerodynamics. J. W. Paulson Jr., D. W. Banks and P. F. Quinto, *NASA Langley Research Center* (JA **20**, 2, p. 159) Article based on AIAA Paper 81-2612

C83-027 Trailing Edge Flap Influence on Leading Edge Vortex Flap Aerodynamics. Arthur C. Grantz and J. F. Marchman III, *Virginia Polytechnic Institute and State University* (JA **20**, 2, p. 165) Article based on AIAA Paper 82-0128

C83-028 Airborne Operation of an Infrared Low-Level Wind Shear Prediction System. Peter M. Kuhn and Richard L. Kurkowski, *NASA Ames Research Center*; and Fernando Caracena, *NOAA-ERL-OWRM* (JA **20**, 2, p. 170) Article based on AIAA Paper 82-0153

C83-029 Icing Analysis of an Unprotected Aircraft Radome. J. Stone and R. Ross, *Ross Aviation Associates* (JA **20**, 2, p. 174) Article based on AIAA Paper 82-0281

C83-030 Strut or Guide Vane Secondary Flows and Their Effect on Turbomachinery Noise. B. Lakshminarayana , D. E. Thompson and R. Trunzo, *The Pennsylvania State University* (JA **20**, 2, p. 178) Article based on AIAA Paper 82-0125

C83-031 Heavy Rain Influence on Airplane Accidents. J. Luers and P. Haines, *University of Dayton Research Institute* (JA **20**, 2, p. 187) Engineering Note

C83-032 Effect of Swirl on the Potential Core in Two-Dimensional Ejector Nozzles. Chong-Wei Chu, Joe Der Jr., Vincent M. Ortiz and Thomas C. Widynski, *Northrop Corporation* (JA **20**, 2, p. 191) Engineering Note

C83-033 Embedded Flow Characteristics of Sharp-Edged Rectanglar Wings. Erik S. Larson, *Aeronautical Research Institute of Sweden* (JA **20**, 3, p. 193) Synoptic

C83-034 Wind Tunnel Investigation of the Transonic Aerodynamic Characteristics of Forward Swept Wings. G. C. Uhuad, T. M. Weeks and R. Large, *Air Force Wright Aeronautical Laboratories (WPAFB)* (JA **20**, 3, p. 195) Article

C83-035 Setting Design Goals for Advanced Propulsion Systems. Tom Warwick, *United Technologies Corporation* (JA **20**, 3, p. 203) Article based on AIAA Paper 81-1505

C83-036 Design, Analyses, and Model Tests of an Aeroelastically Tailored Lifting Surface. W. A. Rogers and W. W. Braymen, *General Dynamics*; and M. H. Shirk, *AFWAL, Flight Dynamics Laboratory (WPAFB)* (JA **20**, 3, p. 208) Article based on AIAA Paper 81-1673

C83-037 Internal Performance Prediction for Advanced Exhaust Systems. Donald W. Speir and Jack T. Blozy, *General Electric Company* (JA **20**, 3, p. 216) Article based on AIAA Paper 81-1490

C83-038 CTOL, STOAL, V/STOL:An Operational Comparison for Forward Deployed CVNs. W. P. Riviere Jr. and N. P. Vignevic, *Naval Air Engineering Center* (JA **20**, 3, p. 222) Article based on AIAA Paper 81-1621

C83-039 Compact Installation for Testing Vectored-Thrust Engines. W. H. Cunningham and J. F. Boytos, *Naval Air Propulsion Center* (JA **20**, 3, p. 229) Article based on AIAA Paper 81-1592

C83-040 High Bypass Ratio Engine Noise Component Separation by Coherence Technique. Belur N. Shivashankara, *The Boeing Commercial Airplane Company* (JA **20**, 3, p. 236) Article based on AIAA Paper 81-2054

C83-041 Dynamic Stability of a Buoyant Quad-Rotor Aircraft. B. L. Nagabhushan, *Goodyear Aerospace Corporation* (JA **20**, 3, p. 243) Article based on AIAA Paper 82-0242

C83-042 Acoustic Environment in Large Enclosures With a Small Opening Exposed to Flow. Leonard Shaw, *Flight Dynamics Laboratory (WPAFB)*; Harold Bartel and James McAvoy, *Lockheed-Georgia Company* (JA **20**, 3, p. 250) Article based on AIAA Paper 82-0121

C83-043 Rotor Hovering Performance Using the Method of Fast Free Wake Analysis. R. H. Miller, *Massachusetts Institute of Technology* (JA **20**, 3, p. 257) Article based on AIAA Paper 82-0094

C83-044 Microwave Ice Accretion Measurement Instrument (MIAMI). B. Magenheim and J. K. Rocks, *Ideal Research Inc.* (JA **20**, 3, p. 262) Article based on AIAA Paper 82-0285

C83-045 Flight Test Results of an Active Flutter Suppression System. John W. Edwards, *NASA Langley Research Center* (JA **20**, 3, p. 267) Article based on AIAA Paper 81-0655 CP812

C83-046 Characterization of Particle Rebound Phenomena in the Erosion of Turbomachinery. Jonathan A. Laitone, *University of Michigan* (JA **20**, 3, p. 275) Article

C83-047 Sonic Fatigue of Advanced Composite Panels. M. J. Jacobson, *Northrop Corporation* (JA **20**, 3, p. 282) Article based on AIAA Paper 81-1699

C83-048 Turbofan Engine Blade Pressure and Acoustic Radiation at Simulated Forward Speed. J. S. Preisser, J. A. Schoenster and R. A. Golub, *NASA Langley Research Center*; and C. Horne, *NASA Ames Research Center* (JA **20**, 4, p. 289) Article based on AIAA Paper 81-0096

C83-049 Supercitical Airfoil Boundary-Layer and Near-Wake Measurements. D. A. Johnson, *NASA Ames Research Center*; and F. W. Spaid, *McDonnell Douglas Corporation* (JA **20**, 4, p. 298) Article based on AIAA Paper 81-1242

C83-050 Effect of Variable Guide Vanes on the Performance of a High-Bypass Turbofan Engine. George A. Bobula, Ronald H. Soeder and Leo A. Burkardt, *NASA Lewis Research Center* (JA **20**, 4, p. 306) Article based on AIAA Paper 81-1362

C83-051 Design and Development of a Mixer Compound Exhaust System. Walter L. Blackmore and Craig E. Thompson, *Garrett Turbine Engine Company* (JA **20**, 4, p. 312) Article based on AIAA Paper 81-1494

C83-052 Investigation of Landing Gear Alternatives for High Performance Aircraft. A. R. DeWispelare and R. P. Stager, *Air Force Institute of Technology (WPAFB)* (JA **20**, 4, p. 319) Article based on AIAA Paper 81-1639

C83-053 Stability of Steady Sideslip Equilibria for High Alpha. R. A. Calico Jr., *Air Force Institute of Technology (WPAFB)*; and S. G. Fuller, *Air Force Wright Aeronautical Laboratories* (JA **20**, 4, p. 327) Article based on AIAA Paper 81-1884 CP816

C83-054 Analysis of Circulation-Controlled Airfoils in Transonic Flow. F. A. Dvorak and D. H. Choi, *Analytical Methods, Inc.* (JA **20**, 4, p. 331) Article based on AIAA Paper 81-1270

C83-055 Tactical Aircraft Engine Usage--A Statistical Study. Robert J. May Jr., David R. Chaffee, Paul B. Stumbo and Mark D. Reitz, *Air Force Wright Aeronautical Laboratories* (JA **20**, 4, p. 338) Article based on AIAA Paper 81-1652

C83-056 Ground Effects on Aircraft Noise for a Wide-Body Commercial Airplane. William L. Willshire Jr., *NASA Langley Research Center* (JA **20**, 4, p. 345) Article based on AIAA Paper 81-1988

C83-057 Degradation and Characterization of Antimisting Kerosene. R. J. Mannheimer, *Southwest Research Institute* (JA **20**, 4, p. 350) Article based on AIAA Paper 81-1423

C83-058 Automated Profiling of the Troposphere. R. G. Strauch, M. T. Decker and D. C. Hogg, *NOAA/ERL/Wave Propagation Laboratory* (JA **20**, 4, p. 359) Article based on AIAA Paper 82-0014

C83-059 Optimum Siting of NEXRAD to Detect Hazardous Weather at Airports. Pravas R. Mahapatra, *National Severe Storms Laboratory* (JA **20**, 4, p. 363) Article

C83-060 Friction Damping of Flutter in Gas Turbine Engine Airfoils. A. Sinha and J. H. Griffin, *Carnegie-Mellon University* (JA **20**, 4, p. 372) Article

C83-061 Modifying a General Aviation Airfoil for Supercritical Flight. Gary B. Cosentino, *University of Colorado* (JA **20**, 4, p. 377) Engineering Note

C83-062 Modeling the Spatial Distribution of Aircraft on Visual Flight Rules. Norman J. Meyerhoff and Jeffrey Garlitz, *U. S. Department of Transportation* (JA **20**, 4, p. 380) Engineering Note

C83-063 Ground Contamination by Fuel Jettisoned from Aircraft in Flight. Harvey J. Clewell III, *Air Force Engineering and Services Center (Tyndall AFB)* (JA **20**, 4, p. 382) Engineering Note

C83-064 Three-Dimensional Viscous Analysis of Ducts and Flow Splitters. Walter L. Blackmore and Craig E. Thompson, *Garrett Turbine Engine Company* (JA **20**, 5, p. 385) Article based on AIAA Paper 81-0277

C83-065 Analysis of Engine Usage Data for Tactical Systems. Robert J. May Jr., David R. Chaffee, Paul B. Stumbo and Mark D. Reitz, *Air Force Wright Aeronautical Laboratories* (JA **20**, 5, p. 390) Article based on AIAA Paper 81-1370

C83-066 Zero-Length Inlets for Subsonic V/STOL Aircraft. E. R. Glasgow and W. E. Beck, *Lockheed-California Company*; and R. R. Woollett, *NASA Lewis Research Center* (JA **20**, 5, p. 397) Article based on AIAA Paper 81-1396

C83-067 18:1 Pressure Ratio Axial/Centrifugal Compressor Demonstration Program. Jeffrey K. Schweitzer, *Pratt & Whitney Aircraft*; and John W. Fairbanks, *U. S. Department of Energy* (JA **20**, 5, p. 404) Article based on AIAA Paper 81-1479

C83-068 Propulsion System Installation Design for High-Speed Prop-Fans. B. H. Little Jr., *Lockheed-Georgia Company* (JA **20**, 5, p. 411) Article based on AIAA Paper 81-1649

C83-069 Design and Development of the RF-5E Aircraft. Ronald M. Gibb, *Northrop Corporation* (JA **20**, 5, p. 418) Article based on AIAA Paper 81-1664

C83-070 Heavy-Lift Airship Dynamics. Mark B. Tischler, Robert F. Ringland and Henry R. Jex, *Systems Technology, Inc.* (JA **20**, 5, p. 425) Article

C83-071 Single- and Double-Wall Cylinder Noise Reduction. F. J. Balena, R. A. Prydz and J. D. Revell, *Lockheed-California Company* (JA **20**, 5, p. 434) Article based on AIAA Paper 81-1968

C83-072 Influence of Leading-Edge Thrust on Twisted and Cambered Wing Design for Supersonic Cruise. Harry W. Carlson and David S. Miller, *NASA Langley Research Center* (JA **20**, 5, p. 440) Article based on AIAA Paper 81-1656

C83-073 Aeroballistic Characteristics of 3-ft-long Parachute Decelerators. Carl T. Calianno, *Naval Air Development Center* (JA **20**, 5, p. 446) Article based on AIAA Paper 81-1950

C83-074 Development and Validation of the V/STOL Aerodynamics and Stability and Control Manual. M. M. Walters and C. Henderson, *Naval Air Development Center* (JA **20**, 5, p. 450) Article based on AIAA Paper 81-2611

C83-075 Computational Treatment of Three-Dimensional Transonic Canard-Wing Interactions. Vijaya Shankar and Norman Malmuth, *Rockwell International Science Center* (JA **20**, 5, p. 456) Article based on AIAA Paper 82-0161

C83-076 Computation of Nonlinear Supersonic Potential Flow over Three-Dimensional Surfaces. M. J. Siclari, *Grumman Aerospace Corporation* (JA **20**, 5, p. 462) Article based on AIAA Paper 82-0167

C83-077 Airplane Model Structure Determination from Flight Data. V. Klein, *JIAFS/GWU Langley Research Center*; J. G. Batterson and P. C. Murphy, *NASA Langley Research Center* (JA **20**, 5, p. 469) Article based on AIAA Paper 81-1866 CP816

C83-078 Turbine Blade Nonlinear Structural and Life Analysis. R. L. McKnight and J. H. Laflen, *General Electric Company*; G. R. Halford and A. Kaufman, *NASA Lewis Research Center* (JA **20**, 5, p. 475) Article based on AIAA Paper 82-1056

C83-079 All-Electric vs Conventional Aircraft: The Production/Operational Aspects. Michael J. Cronin, *Lockheed-California Company* (JA **20**, 6, p. 481) Article based on AIAA Paper 81-0848

C83-080 Sun-Powered Aircraft Disigns. P. B. MacCready, P. B. S. Lissaman and W. R. Morgan, *AeroVironment Inc.*; and J. D. Burke, *Jet Propulsion Laboratory, California Institute of Technology* (JA **20**, 6, p. 487) Article based on AIAA Paper 81-0916

C83-081 The Definition of Short-Period Flying Qualities Characteristics via Equivalent Systems. David E. Bischoff, *Naval Air Development Center* (JA **20**, 6, p. 494) Article based on AIAA Paper 81-1775 CP816

C83-082 New Thermal and Trajectory Model for High-Altitude Balloons. Leland A. Carlson and Walter J. Horn, *Texas A&M University* (JA **20**, 6, p. 500) Article based on AIAA Paper 81-1926

C83-083 Type A V/STOL: One Aircraft for All Support Missions?. Wilfried H. Adelt, *McDonnell Aircraft Company* (JA **20**, 5, p. 508) Article based on AIAA Paper 81-2661

C83-084 Laboratory Study of Add-On Treatments for Interior Noise Control in Light Aircraft. John S. Mixson, Louis A. Roussos and C. Kearney Barton, *NASA Langley Research Center*; Rimas Vaicaitis and Mario Slazak, *Columbia University* (JA **20**, 6, p. 516) Article

C83-085 Advanced Turboprop Cargo Aircraft Systems Study. J. C. Muehlbauer, *Lockheed-Georgia Company*; and S. J. Morris, *NASA Langley Research Center* (JA **20**, 5, p. 523) Article based on AIAA Paper 81-1684

C83-086 Alleviation of the Subsonic Pitch-Up of Delta Wings. Dhanvada M. Rao, *Vigyan Research Associates, Inc.*; and Thomas D. Johnson Jr., *Kentron International, Inc.* (JA **20**, 6, p. 530) Article based on AIAA Paper 82-0129

C83-087 An Axisymmetric Nacelle and Turboprop Inlet Analysis Including Power Simulation. D. P. Golden, T. J. Barber and W. C. Chin, *Pratt & Whitney Aircraft* (JA **20**, 6, p. 536) Article based on AIAA Paper 82-0256

C83-088 A New Facility and Technique for Two-Dimensional Aerodynamic Testing. John B. McDevitt, Thomas E. Polek and Lawrence A. Hand, *NASA Ames Research Center* (JA **20**, 6, p. 543) Article based on AIAA Paper 82-0608 CP822

C83-089 Comparison of Properties of Joints Prepared by Ultrasonic Welding and Other Means. T. Renshaw, K. Wongwiwat and A. Sarrantonio, *Fairchild Republic Company* (JA **20**, 6, p. 552) Article based on AIAA Paper 82-0661 CP823

C83-090 Development of Counter-Rotating Intershaft Support Bearing Technology. William L. Gamble, *Pratt & Whitney Aircraft*; and Raymond Valori, *Naval Air Propulsion Center* (JA **20**, 6, p. 557) Article based on AIAA Paper 82-1054

C83-091 Unique Flight Characteristics of the AD-1 Oblique-Wing Research Airplane. Robert E. Curry and Alex G. Sim, *NASA Ames Research Center* (JA **20**, 6, p. 564) Article based on AIAA Paper 82-1329

C83-092 Performance Estimation for Light Propeller Airplanes. E. V. Laitone, *University of California* (JA **20**, 6, p. 569) Engineering Note

C83-093 Transonic Shock/Turbulent Boundary-Layer Interaction on Curved Surfaces. George R. Inger, *University of Colorado* (JA **20**, 6, p. 571) Engineering Note based on AIAA Paper 81-1244

C83-094 Disadvantages of Thin Airfoil Formulations for Closely Coupled Airfoils. Kamran Rokhsaz and Bruce P. Selberg, *University of Missouri-Rolla* (JA **20**, 6, p. 574) Engineering Note

C83-096 Net-Skirt Addition to a Parachute Canopy to Prevent Inversion. Geoffrey W. H. Stevens, *Mytchett (England)* (JA **20**, 7, p. 578) Synoptic based on AIAA Paper 81-1927

C83-097 V/STOL Status from the Engine Technology Viewpoint. G. M. Lewis and W. J. Lewis, *Rolls-Royce Limited (England)* (JA **20**, 7, p. 580) Synoptic based on AIAA Paper 81-2648

C83-098 A Technique to Determine Lift and Drag Polars in Flight. A. Knaus, *Messerschmitt-Bolkow-Blohm GmbH (FRG)* (JA **20**, 7, p. 587) Article based on AIAA Paper 81-2420

C83-099 Dynamics of Air Combat. W. B. Herbst, *Messerschmitt-Bolkow-Blohm GmbH (FRG)* (AIAAJ **20**, 7, p. 594) Article

C83-100 Configuration Development of a Research Aircraft with Post-Stall Maneuverability. Stephen Ransom, *Messerschmitt-Bolkow-Blohm/Vereinigte Flugtechnische Werke (FRG)* (JA **20**, 7, p. 599) Article

C83-101 Wind Tunnel Tests of Over-the-Wing Nacelles. J. Szodruch and J. Kotschote, *MBB/Vereinigte Flugtechnische Werke GmbH (FRG)* (JA **20**, 7, p. 606) Article based on AIAA Paper 83-0538

C83-102 Improved Numerical Method for Unsteady Lifting Surfaces in Incompressible Flow. A. Ichikawa and S. Ando, *Nagoya University* (JA **20**, 7, p. 612) Article

C83-103 Generalized Maximum Specific Range Performance. Egbert Torenbeek and Hans Wittenberg, *Delft University of Technology* (JA **20**, 7, p. 617) Article

C83-104 Flight Tests of Tow Wire Forces while Flying a Racetrack Pattern. C. Matuk, *University of Lulea (Sweden)* (JA **20**, 7, p. 623) Article

C83-105 Correction to the Wing Source Velocity Error in Woodward's USSAERO Code. Gerrit J. van den Broek, *National Institute for Aeronautics and Systems Technology (South Africa)* (JA **20**, 7, p. 628) Article

C83-106 In-Flight Computation of Helicopter Transmission Fatigue Life Expenditure. Kenneth F. Fraser, *Aeronautical Research Laboratories (Australia)* (JA **20**, 7, p. 633) Article based on AIAA Paper 81-2434

C83-107 F/A-18 Inlet/Engine Compatibility Flight Test Results. Nasim F. Amin, *Northrop Corporation*; and David J. Hollweger, *McDonnell Douglas Corporation* (JA **20**, 8, p. 641) Article based on AIAA Paper 81-1393

C83-108 JT9D Performance Deterioration Results from a Simulated Aerodynamic Load Test. Edward G. Stakolich, *NASA Lewis Research Center*; and William J. Stromberg, *Pratt & Whitney Aircraft Group, United Technologies Corporation* (JA **20**, 8, p. 650) Article based on AIAA Paper 81-1588

C83-109 Recent Improvements in Prediction Techniques for Supersonic Weapon Separation. A. Cenko, *Grumman Aerospace Corporation*; and J. Waskiewicz, *Flight Dynamics Laboratory (WPAFB)* (JA **20**, 8, p. 659) Article based on AIAA Paper 82-0170

C83-110 Helicopter IFR Approaches into Major Terminals Using RNAV, MLS, and CDTI. L. Tobias, H. Q. Lee and L. L. Peach, *NASA Ames Research Center*; F. M. Willett Jr. and P. J. O'Brien, *Federal Aviation Administration Technical Center* (JA **20**, 8, p. 666) Article based on AIAA Paper 82-0260

C83-111 Supersonic Three-Dimensional Oscillatory Piecewise Continuous Kernel Function Method. E. Nissim and I. Lottati, *Technion-Israel Institute of Technology* (JA **20**, 8, p. 674) Article

C83-112 Finite-Element Analysis of the T-38 Aircraft Canopy. R. A. Smith and R. E. McCarty, *Air Force Wright Aeronautical Laboratories* (JA **20**, 8, p. 682) Article based on AIAA Paper 82-0705 CP823

C83-113 Durability and Damage Tolerance Control Plans for U.S. Air Force Aircraft. Michael A. Landy and O. Lester Smithers, *Aeronautical Systems Division (WPAFB)* (JA **20**, 8, p. 689) Article based on AIAA Paper 82-0679 CP824

C83-114 Rigid-Body Structural Mode Coupling on a Forward Swept Wing Aircraft. Gerald D. Miller, John H. Wykes and Michael J. Brosnan, *Rockwell International* (JA **20**, 8, p. 696) Article based on AIAA Paper 82-0683 CP824

C83-115 Transonic Time-Response Analysis of 3-Degree-of-Freedom Conventional and Supercritical Airfoils. T. Y. Yang and J. T. Batina, *Purdue University* (JA **20**, 8, p. 703) Article based on AIAA Paper 82-0680

C83-116 Transonic Flutter Model Study of a Supercritical Wing and Winglet. Charles L. Ruhlin, *NASA Langley Research Center*; Frank J. Rauch Jr. and Catherine Waters, *Grumman Aerospace Corporation* (JA **20**, 8, p. 711) Article based on AIAA Paper 82-0721 CP824

C83-117 The Role and Application of Data Base Management in Integrated Computer-Aided Design. C. L. Blackburn, *Kentron Technical Center*; O. O. Storaasli and R. E. Fulton, *NASA Langley Research Center* (JA **20**, 8, p. 717) Article based on AIAA Paper 82-0681 CP824

C83-118 Injection Slot Location for Boundary-Layer Control in Shock-Induced Separation. P. R. Viswanath, *NASA Ames Research Center*; L. Sankaran, *Hindustan Aeronautics Limited (India)*; P. M. Sagdeo, *Georgia Institute of Technology*; R. Narasimha and A. Prabhu, *Indian Institute of Science* (JA **20**, 8, p. 726) Article based on AIAA Paper 78-1168

C83-119 Freestream Turbulence Effects on Compressor Cascade Wake. R. K. Sullerey and A. Sayeed Khan, *Indian Institute of Technology* (JA **20**, 8, p. 733) Engineering Note

C83-120 The Effect of Displacement Velocity on Propeller Performance. Michio Nishida, *Kyoto University (Japan)* (JA **20**, 8, p. 734) Engineering Note

C83-121 Aerodynamic Aspects of Aircraft Dynamics at High Angles of Attack. K. J. Orlik-Ruckemann, *National Research Council of Canada* (JA **20**, 9, p. 737) Survey Paper based on AIAA Paper 82-1363

C83-122 Aeroservoelasticity in the Time Domain. Malcolm Cutchins, *Auburn University*; James W. Purvis, *Sandia National Laboratories*; and Robert W. Bunton, *Eglin Air Force Base* (JA **20**, 9, p. 753) Article based on AIAA Paper 81-0635 CP812

C83-123 Analysis of Aircraft Dynamic Behavior in a Crash Environment. Gil Wittlin, *Lockheed-California Company* (JA **20**, 9, p. 762) Article based on AIAA Paper 82-0694 CP824

C83-124 Optimum Configuration for a 10-Passenger Business Turbofan Jet Airplane. Moses Aronson, *Aronson Industries* (JA **20**, 9, p. 770) Article based on AIAA Paper 82-0365

C83-125 Moisture and Temperature Effects on the Instability of Cylindrical Composite Panels. James M. Snead and Anthony N. Palazotto, *U. S. Air Force (WPAFB)* (JA **20**, 9, p. 777) Article based on AIAA Paper 82-0741 CP823

C83-126 Preliminary Supersonic Analysis Methods Including High Angle of Attack. Jimmy L. Pittman, *NASA Langley Research Center* (JA **20**, 9, p. 784) Article based on AIAA Paper 82-0938

C83-127 Interior Noise Considerations for Advanced High-Speed Turboprop Aircraft. J. S. Mixson, F. Farassat and J. D. Leatherwood, *NASA Langley Research Center*; R. Prydz and J. D. Revell, *Lockheed California Company* (JA **20**, 9, p. 791) Article based on AIAA Paper 82-1121

C83-128 Aircraft Trajectories for Reduced Noise Impact. Robert G. Melton, *The Pennsylvania State University*; and Ira D. Jacobson, *The University of Virginia* (JA **20**, 9, p. 798) Article

C83-129 Bonded Aluminum Honeycomb--Aircraft Flight Surface Primary Structure Application. T. R. Logan, *Boeing Commercial Airplane Company*; and U. Soudak, *Israel Aircraft Industries, Ltd.* (JA **20**, 9, p. 805) Article based on AIAA Paper 82-0676 CP824

C83-130 Apparent-Mass Coefficients for Isosceles Triangles and Cross Sections Formed by Two Circles. Ming-Ke Huang and Chuen-Yen Chow, *University of Colorado* (JA **20**, 9, p. 810) Article

C83-131 Design Optimization Codes for Structures: DOCS Computer Program. D. T. Nguyen, *Northeastern University*; J. S. Arora and A. D. Belegundu, *The University of Iowa* (JA **20**, 9, p. 817) Article

C83-132 Vortex Flow Over Delta and Double-Delta Wings. H. W. M. Hoeijmakers and W. Vaatstra, *National Aerospace Laboratory NLR (The Netherlands)*; and N. G. Verhaagen, *Delft University of Technology* (JA **20**, 9, p. 825) Article based on AIAA Paper 82-0949

C83-133 Experimental Wing and Canard Jet-Flap Aerodynamics. D. B. Smeltzer and D. A. Durston, *NASA Ames Research Center*; and V. R. Stewart, *Rockwell International* (JA **20**, 10, p. 833) Synoptic based on AIAA Paper 83-0081

C83-134 Evaluation of Four Subcritical Response Methods for On-Line Prediction of Flutter Onset in Wind Tunnel Tests. Charles L. Ruhlin, Judith J. Watson, Rodney H. Ricketts and Robert V. Doggett Jr., *NASA Langley Research Center* (JA **20**, 10, p. 835) Article based on AIAA Paper 82-0644 CP824

C83-135 Effects of Angle of Attack on Transonic Flutter of a Supercritical Wing. E., Carson Yates Jr., Eleanor C. Wynne and Moses G. Farmer, *NASA Langley Research Center* (JA **20**, 10, p. 841) Article based on AIAA Paper 82-0647 CP824

C83-136 Stress Analysis of Stepped-Lap Joints with Bondline Flaws. H. P. Kan and M. M. Ratwani, *Northrop Corporation* (JA **20**, 10, p. 848) Article based on AIAA Paper 82-0737 CP823

C83-137 Subsonic/Supersonic Aeropropulsive Characteristics of Nonaxisymmetric Nozzles Installed on an F-18 Model. Francis J. Capone, *NASA Langley Research Center*; Brian L. Hunt, *Northrop Corporation*; and Greg E. Poth, *USAF Wright Aeronautical Laboratories* (JA **20**, 10, p. 853) Article based on AIAA Paper 81-1445

C83-138 Strong Pressure Waves in Air-Breathing Engines. V. E. Haloulakos, *McDonnell Douglas Astronautics Company* (JA **20**, 10, p. 859) Article based on AIAA Paper 81-1475

C83-139 Model Test and Full-Scale Checkout of Dry-Cooled Jet Runnup Sound Suppressors. James L. Grunnet, *FuiDyne Engineering Corporation*; and Edward Ference, *Naval Facilities Engineering Command* (JA **20**, 10, p. 866) Article based on AIAA Paper 82-1239

C83-140 Analysis of General Aviation Accidents Using ATC Radar Records. R. C. Wingrove and R. E. Bach Jr., *NASA Ames Research Center* (JA **20**, 10, p. 872) Article based on AIAA Paper 82-1310

C83-141 Correlation of Flight Test and Analytic M-on-N Air Combat Exchange Ratios. D. S. Hague, *Aerophysics Research Corporation* (JA **20**, 10, p. 877) Article based on AIAA Paper 82-1328

C83-142 Drag of Wings with Cambered Airfoils and Partial Leading-Edge Suction. James DeLaurier, *University of Toronto* (JA **20**, 10, p. 882) Article

C83-143 PAN AIR Applications to Complex Configurations. A. Cenko, *Grumman Aerospace Corporation* (JA **20**, 10, p. 887) Article

C83-144 Wave Drag Prediction Using a Simplified Supersonic Area Rule. E. J. Jumper, *Air Force Institute of Technology* (JA **20**, 10, p. 893) Engineering Note

C83-145 Approximation to the Optimization of a Coast-Glide Trajectory. Israel Shruster and Israel Carpas, *Israel Aircraft Industries Ltd.* (JA **20**, 10, p. 895) Engineering Note

C83-146 Optimal Frequency Response Modification by Added Passive Structures. L. Kitis, *Worcester Polytechnic Institute*; W. D. Pilkey and B. P. Wang, *University of Virginia* (JA **20**, 11, p. 897) Synoptic

C83-147 Time-Marching Transonic Flutter Solutions Including Angle-of-Attack Effects. John W. Edwards, Robert M. Bennett, Woodrow Whitlow Jr. and David A. Seidel, *NASA Langley Research Center* (JA **20**, 11, p. 899) Article based on AIAA Paper 82-0685 CP823

C83-148 Tensile Buckling of Advanced Turboprops. C. C. Chamis and R. A. Aiello, *NASA Lewis Research Center* (JA **20**, 11, p. 907) Article based on AIAA Paper 82-0776 CP823

C83-149 Experiences in the Use of Composite Material for a Wing Skin. Clinton V. Eckstrom, *NASA Langley Research Center*; and Charles V. Spain, *Kentron Technical Center* (JA **20**, 11, p. 913) Article based on AIAA Paper 82-0676 CP823

C83-150 Pressure Measurements on Twin Vertical Tails in Buffeting Flow. William E. Triplett, *McDonnell Aircraft Company* (JA **20**, 11, p. 920) Article based on AIAA Paper 82-0641 CP823

C83-151 Investigation of Tangential Blowing Applied to a Subsonic V/STOL Inlet. Richard R. Burley and Danny P. Hwang, *NASA Lewis Research Center* (JA **20**, 11, p. 926) Article based on AIAA Paper 82-1084

C83-152 An Assessment of the Safety of Hydrogen-Fueled Aircraft. G. Daniel Brewer, *Lockheed-California Company* (JA **20**, 11, p. 935) Article based on AIAA Paper 82-1236

C83-153 Prediction of Parachute Line Sail During Lines-First Deployment. James W. Purvis, *Sandia National Laboratories* (JA **20**, 11, p. 940) Article

C83-154 Acoustics of Rotors Utilizing Circulation Control. Marianne Mosher, *NASA Ames Research Center* (JA **20**, 11, p. 946) Article

C83-155 Lateral Attenuation of Aircraft Noise. G. J. J. Ruijgrok, *Delft University of Technology* (JA **20**, 11, p. 953) Article

C83-156 Trimming Advanced Fighters for STOL Approaches. J. W. Paulson Jr., G. M. Gatlin, P. F. Quinto and D. W. Banks, *NASA Langley Research Center* (JA **20**, 11, p. 957) Article based on AIAA Paper 83-1068

C83-157 Analysis of an Airplane Windshield Anti-Icing System Using Hot Air. R. Ross, *Ross Aviation Associates* (JA **20**, 11, p. 963) Article based on AIAA Paper 82-1372

C83-158 Adaptable Wind Tunnel for Testing V/STOL Configurations at High Lift. W. R. Sears, *University of Arizona* (JA **20**, 11, p. 968) Article based on AIAA Paper 82-0541 CP822

C83-159 Jet Trajectories and Surface Pressures Induced on a Body of Revolution with Various Dual Jet Configurations. J. A. Schetz and A. K. Jakubowski, *Virginia Polytechnic Institute and State University*; and K. Aoyagi, *NASA Ames Research*

Center (JA **20**, 11, p. 975) Article based on AIAA Paper 83-0080

C83-160 A Fundamental Comparison of Canard and Conventional Configurations. Tad McGeer and Ilan Kroo, *Stanford University* (JA **20**, 11, p. 983) Article

C83-161 Observations and Implications of Natural Laminar Flow on Practical Airplane Surfaces. B. J. Holmes, *NASA Langley Research Center*; and C. J. Obara, *Kentron International, Inc.* (JA **20**, 12, p. 993) Survey Paper

C83-162 Control of Aeroelastic Divergence. Richard R. Chipman, Alex M. Zislin and Catherine Waters, *Grumman Aerospace Corporation* (JA **20**, 12, p. 1007) Article based on AIAA Paper 82-0684 CP824

C83-163 Dynamic Stability of Flexible Forward Swept Wing Aircraft. Terrence A. Weisshaar and Thomas A. Zeiler, *Purdue University* (JA **20**, 12, p. 1014) Article

C83-164 A Root Locus-Based Flutter Synthesis Procedure. Prabhat Hajela, *Stanford University* (JA **20**, 12, p. 1021) Article based on AIAA Paper 83-0063

C83-165 Statistical Crack Propagation in Fastener Holes Under Spectrum Loading. Jann N. Yang, *The George Washington University*; and Robert C. Donath, *Air Force Wright Aeronautical Laboratories* (JA **20**, 12, p. 1028) Article

C83-166 Transient Flow Analysis of an Aircraft Refueling System. S. E. Parks, *U.S. Air Force*; and M. E. Franke, *Air Force Institute of Technology* (JA **20**, 12, p. 1033) Article based on AIAA Paper 81-1641

C83-167 Aircraft Carrier–Surface Effect Ship. Donald P. Germeraad, *Lockheed Missiles and Space Company* (JA **20**, 12, p. 1037) Article based on AIAA Paper 82-0808

C83-168 Uses of Parameter Estimation in Flight Test. Kenneth W. Iliff and Richard E. Maine, *NASA Ames Research Center* (JA **20**, 12, p. 1043) Article based on AIAA Paper 82-1373

C83-169 Effects of Atmospheric Turbulence on a Quadrotor Heavy Lift Airship. Mark B. Tischler, *U. S. Army Research and Technology Laboratories*; and Henry R. Jex, *Systems Technology, Inc.* (JA **20**, 12, p. 1050) Article based on AIAA Paper 82-1542 CP825

C83-170 Computations of Unsteady Transonic Aerodynamics Using Prescribed Steady Pressures. K.-Y Fung and A. W. Chung, *University of Arizona* (JA **20**, 12, p. 1058) Article based on AIAA Paper 82-0956

C83-171 An Exploratory Study of Area-Efficient Vortex Flap Concepts. Dhanvanda M. Rao, *Vigyan Research Associates, Inc.* (JA **20**, 12, p. 1062) Article

C83-172 Application of Energy Saving Concepts to Fighter/Attack Design. S. A. Powers, H. H. Driggers and T. E. Krieg, *Vought Corporation* (JA **20**, 12, p. 1068) Article based on AIAA Paper 83-0092
